4066 CAMP FOUR ROAD – RHINELANDER, WI 54501 - 715-272-1105

God Bless America!

Dates to Remember

- 1/26 Report Card Day!
- 1/28 SCO Meeting – 6 p.m.
- 2/1 No School For Students
- 2/1 Parent/Teacher Conferences 1-7
- 2/19 No School / Inservice Day

We're Still Walking!

The Sugar Camp School Mile Club is in full swing this year. Nearly every school day, students have the opportunity to walk a mile during 2:00 recess. So far this year, we have two students who have achieved the 75-mile mark, nine students who have met the 50 milestone, and 18 who have made the 25 milestone. At each of those milestones, students receive a charm that has been designed by last year's fourth-graders and manufactured in the Three Lakes Fab Lab. Students display their charms proudly on a ring and also receive a small prize with each charm. Those who make the 100 milestone this year will be entered in a raffle for an autographed Mason Crosby football. Keep on walking kids!

Only in the darkness, can you see the stars.

Martin Luther King, Jr.

From the Library Shelf...

Who doesn't love a good movie? Especially when it's based on a fantastic piece of literature! This week, the library recommends that you read a book that will soon be hitting the big screen... *A Wrinkle in Time* by Madeleine L'Engle is a classic for all ages and has recently been adapted into a graphic novel by Hope Larson. This story is about a girl named Meg who embarks on an adventure through time and space in an attempt to find her father, a physicist who disappeared while experimenting with time travel. Check it out today if you love a good story that you can get really lost in!

How Well Does Your Boat Float?

Students in fifth-grade have been studying the properties of matter and energy. As part of their study on buoyancy, they were asked to construct an aluminum foil boat. They were each given a 10 x 10 inch piece of aluminum foil and 15 minutes to construct it. The first challenge was to see if their boat would float. The second part of the challenge was to see what would happen as mass was added to the boat. To test this out, students floated their boats and then added mass (in the form of 1" paper clips) to their boat. They added paper clips and kept track of the amount of mass that was added until the boat sunk! A discussion about mass, buoyancy, and density followed. All boats floated, and Christian Jolin constructed the winning boat that held the most mass. His boat held 611 paper clips!

Fuel Up to Play 60

The Fuel Up Team has been working hard on planning and facilitating activities to keep the school busy during these long, cold months of winter! This week, K-2 students participated in a fun series of relay races, while the 3-6 grade students played an exciting game of rimmer ball! The students had a great time being active and cheering each other on. A big thank you to all who participated and to the Fuel Up team for devoting so much time to the wellness of their classmates!

Lunch Menu

Monday - Chicken nuggets, mashed potatoes, gravy, corn, fruit.
 Tuesday - Waffles or pancakes, cheese omelet, sausage, cucumbers, orange juice.
 Wednesday - Cheesy potatoes and ham, peas, dinner roll, fruit.
 Thursday - Orange chicken, rice, mixed veggies, strawberry jello, fruit.
